100% ARCHIVAL  
MATBOARD  
WITH THE PROVEN  
PROTECTION  
OF ARTCARE  
TECHNOLOGY

Bainbridge®

# ARTCARE™ Age-Defying Protection

Artcare products feature the patented MicroChamber® technology that provides a preventative conservation protection unavailable with other matboard. A unique combination of zeolites and buffers traps and neutralizes oxidizing gasses, other pre-acidic gasses, and degradative by-products – giving Artcare boards the ability to actively protect art and photographs against attack by external pollutants and internal vices.

## Museum Quality Protection

Only Artcare offers active preservation for treasured art and photographs that your customers will value forever.

\* Bainbridge audits every production lot to ensure conformance to industry standards for optimum fade and bleed resistance. Not all conservation matboards meet these stringent standards. Does not apply to fabric surfaces.

## See the Artcare Difference

Artcare™ Archival  
Protection

OTHER  
Archival Protection

In independent lab tests, the images above were exposed to concentrated doses of nitrogen dioxide, the most common air pollutant. Both were tested in the same testing chamber for the same length of time. Neither were exposed to light during testing. The results prove the proactive performance of the Artcare Archival System.

## Library of Congress study proves effectiveness of Artcare Technology

- The zeolite in Artcare **absorbs pollutants** more effectively than rag board without zeolites. Artcare boards outperform traditional museum board.
- Artcare boards **trap and hold** pollutants better than any other archival board
- Library of Congress tests prove that Artcare works in **real-world** air pollution concentrations

## Alphamat® Artcare Technical Specifications

### Furnish:

100% virgin alpha-cellulose fiber which meets the most stringent standards for stability and permanence. Tests conducted in accordance with TAPPI Method T-236 om-85 / ISO 302 indicate the board to be free of groundwood and lignin.

### pH value:

An alkaline pH of 8.9 +/- .4 indicated using TAPPI Method T-509 om-88 cold extraction on slurried pulp.

### Buffer:

Alkaline reserve of 3-5% measured by ANSI IT9.2-1991 Sec 5.2.

### Molecular Traps:

Contains molecular traps synthesized specifically for adsorption of air pollution gasses and degradative by-products of artwork, photographic media and wood mouldings.

### Lightfastness:

Fade resistance established using a Xenon Fadometer in accordance with ASTM D3424. Alphamat colors exhibit less than 2.5 point brightness shift.

### Bleed Resistance:

No bleed visible after 48-hour submersion using method FACTS EXPMMB-2000 Sec.10.03.

### Resistance to Aging:

Samples tested in air circulation oven for 12 days at 100°C and for 10 days in temperature humidity chamber at 100°F and 90% relative humidity. All board components remained unchanged in appearance and strength.

### Sizing & Adhesives:

Water-based alkaline adhesive with no solvents is used to adhere component parts of Alphamat boards.

### Meets quality standards set by the Fine Art Trade Guild

# ALPHAMAT® ARTCARE™

Alphamat Artcare provides the best selection of solid colors available, made to the exacting 100% surface archival standards of the world's top conservators, and designed to provide you with every tint, tone, and shade you need. Alphamat Artcare boards are conservation quality matboards that are acid-free, lignin-free, bleed and fade resistant throughout all components. In addition to being of conservation quality, these mats feature the unparalleled and proven protection of Artcare technology. Artcare products feature the patented MicroChamber® technology that provides preventative conservation protection unavailable with other matboard. A unique combination of zeolites and buffers traps and neutralizes oxidizing gases, other pre-acidic gases, and degradative byproducts giving Artcare boards the ability to actively protect art and photographs against attack by external pollutants and internal vices.

## FEATURES:

- AlphaMat Artcare meets all conservation standards set by the Fine Art Trade Guild
- 100% virgin alpha-cellulose fiber which meets the most stringent standards for stability and permanence
- Buffered with calcium carbonate to an alkaline reserve of 3-5% ph 8.5-9.5
- Acid-free and lignin-free, fade and bleed-resistant
- The most extensive assortment of distinctive surface textures designed to enhance and embellish your creative matting
- Features the unparalleled and proven protection of Artcare technology

# ALPHARAG<sup>®</sup> ARTCARE™

S P E C I F I E R

The **absolute finest,**  
**most protective**  
**matboard**  
**in the world.** Literally.

- ★ 100% Virgin Cotton
- ★ Artcare protection
- ★ Museum grade

Bainbridge<sup>®</sup>

# ARTCARE™ Age-Defying Protection

Artcare products feature the patented MicroChamber® technology that provides a preventative conservation protection unavailable with other matboard. A unique combination of zeolites and buffers traps and neutralizes oxidizing gasses, other pre-acidic gasses, and degradative by-products – giving Artcare boards the ability to actively protect art and photographs against attack by external pollutants and internal vices.

## Museum Quality Protection

| Only Artcare offers active preservation for treasured art and photographs that your customers will value forever. | Artcare Archival Matboard | OTHER Conservation Matboard |
|---|---------------------------|-----------------------------|
| Slows art and paper degradation   | YES                       | NO                          |
| Neutralizes acid by-products  | YES                       | NO                          |
| Protects against damaging pollutants  | YES                       | NO                          |
| Acid-free and lignin-free   | YES                       | YES                         |
| Fade and bleed resistant  | YES*                      | YES*                        |
| Buffered to maintain alkaline pH  | YES                       | YES                         |

\* Bainbridge audits every production lot to ensure conformance to industry standards for optimum fade and bleed resistance. Not all conservation matboards meet these stringent standards. Does not apply to fabric surfaces.

## See the Artcare Difference

Artcare™ Archival Protection

OTHER Archival Protection

In independent lab tests, the images above were exposed to concentrated doses of nitrogen dioxide, the most common air pollutant. Both were tested in the same testing chamber for the same length of time. Neither were exposed to light during testing. The results prove the proactive performance of the Artcare Archival System.

## Library of Congress study proves effectiveness of Artcare Technology

- The zeolite in Artcare **absorbs pollutants** more effectively than rag board without zeolites. Artcare boards outperform traditional museum board.
- Library of Congress tests prove that Artcare works in real-world air pollution concentrations
- Artcare boards **trap and hold** pollutants better than any other archival board
- **Meets Museum quality standards set by the Fine Art Trade Guild**

## Artcare Technical Specifications

### Furnish:

100% virgin alpha-cellulose fiber which meets the most stringent standards for stability and permanence. Tests conducted in accordance with TAPPI Method T-236 om-85 / ISO 302 indicate the board to be free of groundwood and lignin.

### pH value:

An alkaline pH of 8.9 +/- .4 indicated using TAPPI Method T-509 om-88 cold extraction on slurried pulp.

### Buffer:

Alkaline reserve of 3-5% measured by ANSI IT9.2-1991 Sec 5.2.

### Molecular Traps:

Contains molecular traps synthesized specifically for adsorption of air pollution gasses and degradative by-products of artwork, photographic media and wood mouldings.

### Lightfastness:

Fade resistance established using a Xenon Fadometer in accordance with ASTM D3424. Alphamat colors exhibit less than 2.5 point brightness shift.

### Bleed Resistance:

No bleed visible after 48-hour submersion using method FACTS EXPMMB-2000 Sec.10.03.

### Resistance to Aging:

Samples tested in air circulation oven for 12 days at 100°C and for 10 days in temperature humidity chamber at 100°F and 90% relative humidity. All board components remained unchanged in appearance and strength.

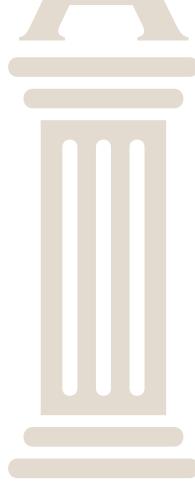

### Sizing & Adhesives:

Water-based alkaline adhesive with no solvents is used to adhere component parts of Alphamat boards.

## Alpharag Artcare Detailed Specifications

| Attribute                              | Test Method  | ISO Equivalent | Value   |

## FABRICS & TEXTURES

ALL-INCLUSIVE  
ALL-IN-ONE  
ALL FABRIC

Fine weaves, natural linens, silks, and designer textures provide just the right elegant surround for classic framing designs. All Bainbridge Fabrics & Textures are laminated to an Alphamat core and backing, for long-lasting beauty and enhanced protection.

### COMPONENTS:

- Extensive selection of fabric, metallic, and textured surfaces
- 100% Conservation core and backing
- Acid and lignin free
- Specifically designed with today's trends in mind

### RECOMMENDED FOR:

- Fine art prints
- Limited edition prints
- Valuable documents
- Original photography

Bainbridge

# ARBOR

## Woodgrains

Add a subtle layer of visual interest with natural and contemporary woodgrain patterns. The realistic look of Arbor mimics the beauty of real wood, adding a warm and organic feel to your framing. Solid color cores, carefully picked to match each woodgrain surface, create a seamless connection between the artwork and the natural world. Combine the organic beauty of Arbor with its 100% conservation quality and you have a one-of-a-kind work of art.

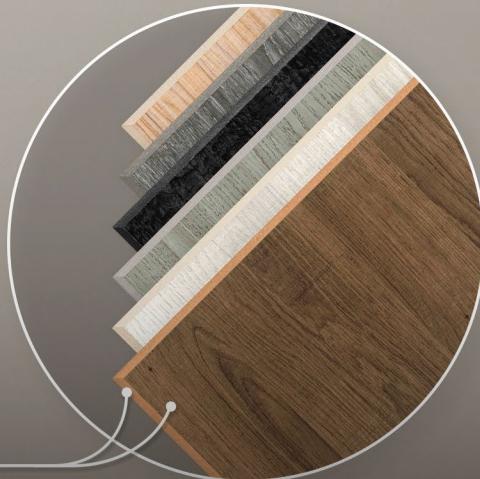

Truly texturized grain  
you can both see  
and feel

A beautiful top mat  
Subtly unique in the reveal

Natural  
& timeless  
aesthetic.  
A true nod  
to nature.

100% Conservation  
matching solid core  
and backing
